

Calculator Game

SHELL SHOCKER: Calculator game for two players or two teams.

- Choose any two of the following five numbers: 4, 0.8, 2.5, 0.2, 40
- Play the game top down or left right.
- The aim of the game is to finish first from one edge to the opposite.
- Multiply the two numbers you have chosen or divide one by the other.
- Your answer should be the same as one of the numbers inside the hexagons you selected.
- To win there must be connected hexagons and you must finish at the opposite edge first.
- You are given two chances to try, about 15 seconds for each try and the game is played in turn.
- Keep a record of the two numbers which worked for you. In your record, show whether you multiplied or divided one number by the other.
- Whoever gets to the opposite end first is the winner. You may discuss your answers but quietly.
- Have fun!
